

In the photos of some of their past projects, we can see the results of the craftsmanship. The patterns add a creative element to the structural integrity of the staircases. The patterns are tactile and invite examination not only by the eyes but the hands as well. The designs are timeless and could work in a colonial building as well as modern houses. We have limited this article to staircase balusters but the company produces grilles for gates, fences, burglar bars etc. All to the same exquisite taste

Enter the calming world of “grayescapade”, where you can leave your woes and worries behind with the relaxing layers of neutrals drenched in cool light and soft details. A metropolitan home that can only be delivered by your contemporary modern.

The calming world of “grayescapade”

Jayvane Interiors has unveiled a living room project in Ikoyi with a gray colour scheme. It has created a cosy world to calm the senses....

Though expansive, this posh contemporary home looks warm and inviting as warm neutrals dominate the space such as the dove white walls that have yellow undertones. To give a splash of casual cool, the color gray is generously coated as a backdrop for the rest of the interior complementing the cozier hues. Neutral colors go well with any other color, but there’s nothing more timeless looking than a white, gray and black that are mixed and matched. Like silhouettes in a haze, the hints of black gives’ depth to the space and contrast to the pale elements.

Colors are nothing without well-designed lighting with a balance of your ambient and focused illumination. Primarily, natural light reaches all corners of the interior space, thanks to the light-colored ceilings and walls. Pulling the elements together is the lovely sputnik luminaire in gold that adds a dash of glimmer to the space, and is the main focal point of the room. An adjustable wall lamp is also provided near your dining, fun and functional.

One of the challenges of open-planned interiors is how to define spaces and provide a layer of privacy while keeping a space that is cohesive and flowing. This contemporary interior is configured for flexibility but its present layout is able to maximize the space and cleverly positioned key function areas without obstructing the flow of the plan.

Some of the interior design's simple pleasures is adding interesting designs from the most creative designers and craftsmen as you can see in the unique side profile of our leathery seater. All furniture in the property is crafted by @jayvaneinterior

More than the visual experience, the different textures come together to create a more "lived in" feel to the space. Velvety cushions, translucent finishes, cotton-covered puff seats, and a pop of rich leather sheened couch, that's just their seating humbly against the pale backdrop.

Tying together elements, notice a continuum of design. The dining set for instance has seats that are in a similar gray color as the sofa lounge behind them. Yet, the pair still works well in the company of darker-colored corner seats.
